RG104 E-1 Box 134 Apr-July 1885

Phila June 9th 1885

Hon A Louden Snowdon
Supt U. S Mint

Dear Sir

On three former occasions within the last five years I have written you urging the removal of John A Greer as assistant under me. On each of those occasions you then urged me to see whether I could not induce him to do his duty and thus avoid what to you is so painful a duty - removing an Employee. I have repeatedly urged Mr Greer the importance of closer attention to duty and for a time he seems to change for the better but soon falls back again to his old habits. He gives no willing service and is either incapable

or indisposed to perform his duty in a proper manner I cannot get him to keep his Engine in proper order.

I am sorry to make this report at a time when you are so soon to leave us, but this fact makes me write as I feel I owe it to you and the service that the efficiency of this branch of the Mint should be placed on a par with the other departments which you have made so efficient. This can only be done by the removal of Grier and the promotion of the man next in place

Hon. A. Loudon Snowden
Supt. U.S. Mint

Dear Sir

On three former occasions within the last five years I have written you urging the removal of John A. Grier as assistant under me. On each of those occasions you then urged me to see whether I could not induce him to do his duty and thus avoid what to you is so painful a duty – removing an Employee. I have repeatedly urged Mr. Greer the importance of closer attention to duty and for a time he seams to change for the better but soon falls back again to his old habits. He gives no willing service and is either incapable or indisposed to perform his duty in a proper manner I cannot get him to keep his engine in proper order.

I am sorry to make this report at a time when you are so soon to leave us, but this fact makes me write as I feel I owe it to you and the service that the efficiency of this branch of the Mint should be placed on a par with the other departments which you have made so efficient. This can only be done by the removal of Grier and the promotion of the man next in place.
